April 18, 2011

CMS has established **Option J (Java Application Developer)** for the **Information Systems Analyst** class series. This announcement is being provided for your information if you wish to pursue qualifying for an Option J ISA I, ISA II, or ISA III. ***This announcement does not represent any actual vacancies.***

Information on Multiple-Choice Exam for Option J

- The Option J exam will deal with the following concepts related to the Java technology:
 - Program Development
 - System/Program Design
 - System Testing
 - Database Development & Management
 - System Integration
 - A detailed **Test Information Guide** has been provided by CMS to help you prepare for the exam. [Link to Option J Test Information Guide.](#)
-

Qualifying for Option J

To qualify for an Option J Information Systems Analyst position, you must receive a qualifying grade on the Option J multiple-choice exam.

Certified State employees: Please go to a CMS Assessment Center with your completed CMS-100B employment application.

CMS will verify you meet the minimum education/experience requirements for the targeted ISA title. The education and experience requirements for the Information Systems Analyst series are listed on the [class specification](#).

Those individuals who are deemed to meet the minimum educational/experience requirements for the targeted ISA title will be administered an automated multiple-choice exam. Please view the [exam schedule](#) on the CMS Work for Illinois website for times and locations.

Current Information Systems Analysts who wish to qualify for Option J within their same title should contact IDES Human Resources for more information.

If you have any questions, please call Sudi Garcia in HRM Recruitment & Selection at 312-793-5707.
